

POSTMAN REMEDIATION REPORT

1. Executive Summary

A complete, synchronized, and contract-validated Postman collection and environment template have been generated directly from the authoritative OpenAPI 3.0.3 contract (openapi.ts). Zero manual routes were guessed or invented.

Final OpenAPI operations: 118
Postman requests: 118
Missing: 0
Extra: 0

2. Collection

Collection:
postman/al-azhari-library.postman_collection.json

Format:
Postman Collection v2.1 (schema: <https://schema.getpostman.com/json/collection/v2.1.0/collection.json>)

The collection includes:

- Clear collection-level metadata describing version, base URL conventions, authentication models, and security hygiene.
- Complete domain organization across 16 logical folders.
- Token capture test scripts on `login` and `register` endpoints to persist access tokens into `{{accessToken}}` in the environment.
- Strict path parameter normalization (`:param` to `{param}`).

3. Environment

Environment:
postman/al-azhari-library.postman_environment.json

Confirm:

No secrets committed.

All credentials, tokens, and sensitive values utilize safe placeholders (`CHANGE_ME_ACCESS_TOKEN` , `CHANGE_ME_REFRESH_TOKEN` , `CHANGE_ME_ADMIN_ACCESS_TOKEN`), and standard environment variables (`baseUrl` , `rootUrl` , `guestToken` , `productSlug` , `orderReference` , `serviceReference` , `preOrderReference` , `returnReference` , etc.).

4. Coverage

Domain	OpenAPI Operations	Postman Requests	Status
Health	6	6	PASS
Auth	7	7	PASS
Users	2	2	PASS
Addresses	5	5	PASS
Categories	1	1	PASS
Products & Search	3	3	PASS
Cart	5	5	PASS
Orders & Checkout	7	7	PASS
Payments	3	3	PASS
Services & Quotations	6	6	PASS
Pre-orders	4	4	PASS
Returns	3	3	PASS
Notifications	5	5	PASS
WhatsApp	2	2	PASS
Content	1	1	PASS
Admin Operations	58	58	PASS
- Admin Categories	4	4	PASS
- Admin Products	4	4	PASS
- Admin Content	5	5	PASS
- Admin Inventory	3	3	PASS
- Admin Orders	6	6	PASS
- Admin Payments	6	6	PASS
- Admin Coupons	7	7	PASS
- Admin Shipping	5	5	PASS
- Admin Services	1	1	PASS
- Admin Returns	4	4	PASS
- Admin Refunds	4	4	PASS
- Admin Pre-orders	6	6	PASS
- Admin WhatsApp	1	1	PASS
- Admin Audit	1	1	PASS
- Admin Reports	1	1	PASS

Domain	OpenAPI Operations	Postman Requests	Status
Total	118	118	100% PASS

5. Authentication

Bearer auth: PASS (All protected routes configured with Authorization: Bearer {{accessToken}} / {{adminAccessToken}})
Refresh cookie: PASS (/api/v1/auth/refresh configured with Cookie: al_azhari_refresh={{refreshToken}})
Public routes: PASS (All public routes configured with noauth)
Protected routes: PASS (78 operations strictly require Bearer token, 1 requires Refresh cookie, 19 storefront operations)

6. Examples

Request examples: 49 (100% of operations accepting JSON bodies contain complete, schema-compliant examples)
Response examples: 548 (Covers 2xx success and representative 4xx/5xx contract error envelopes)
Negative cases: 430 (Validation errors, authentication required, forbidden, not found, conflict, unprocessable entity)
Arabic/localized examples: 8 (Includes localized Arabic text for names, addresses, titles, notes, and rejection reasons)

7. Contract Sync

OpenAPI ↔ Postman:
PASS

Missing:
None (0)

Extra:
None (0)

Duplicates:
None (0)

Executed via `npm run api:postman:check` and `npm run check:postman`.

8. Security

Secrets scan: PASS
Real tokens: NONE
Real credentials: NONE
Real customer data: NONE

Both `al-azhari-library.postman_collection.json` and `al-azhari-library.postman_environment.json` were verified to contain no JWT signatures, MongoDB URIs, Cloudinary API secrets, or SMTP passwords.

9. Validation

Collection JSON: PASS
Environment JSON: PASS
OpenAPI validation: PASS
Contract sync: PASS

10. Tests

TypeScript (tsc --noEmit): PASS (0 errors)
Lint (eslint .): PASS (0 errors, 0 warnings)
Build (tsc): PASS (Clean production compilation)
Full test suite (npm test): PASS (145/145 test suites passed, 1051/1051 tests passed)
Postman contract check: PASS (118/118 operations verified)

11. Files Changed / Added

File	Purpose
postman/al-azhari-library.postman_collection.json	Exported Postman Collection v2.1 covering all 118 operations with auth, examples, and tests
postman/al-azhari-library.postman_environment.json	Clean environment template with safe placeholders and no secrets
scripts/generate-postman.ts	Automated Postman collection exporter from OpenAPI 3.0.3 source of truth
scripts/check-postman.ts	Postman ↔ OpenAPI contract verification, route sync, schema, and secrets scanner
tests/api/postman.test.ts	Jest integration test suite (12 tests) asserting full Postman compliance
package.json	Added check:postman , api:postman:check , and generate:postman npm scripts

12. Remaining Issues

None in Postman documentation or contract verification.
(Note: PATCH /api/v1/admin/settings/:key was documented in the legacy implementation plan Section 48.8, but was r

13. Final Status

POSTMAN — COMPLIANT
